

Digital Signage Set Up

Our web managed digital signage is a streamline and easy process. With templates and powerful tools, senior living communities can provide a consistent and professional experience for residents.

- Easy to view, add and delete all digital devices from one location
- See what systems are online/offline for easy monitoring
- Create groups for your devices to tailor to your community needs
- Create and add new screens to showcase your unique community

Getting Started:

- Click [here](#) for step by step instructions to step up Fire TV
- Turn off "Still Watching"
 - Step 1: Visit system preferences. From the Firestick home screen, press the  to pull up the system settings dashboard. Then press "Preferences"
 - Step 2: Click "Data Usage Monitoring"
 - Step 3: Turn "Still Watching" setting to "Off" From the Data Usage Monitoring screen, toggle the feature named "Still Watching" to "Off".
- Once Fire TV is set up, use the main menu on your Fire TV to search for the TSOLife app and download.
- Once downloaded, login with your TSOLife credentials (the same username and password you use for website and mobile app)
- You will be prompted to name the screen
- Select the calendar screens you would like displayed (daily, weekly, and monthly calendar and care type)
- Click Save

On the website, navigate to "Engagement" and click "Digital Signage", here you will have full access to edit, create, and control your Digital Signage
